

Logotype and Pictogram

The pictogram represents a cyclist in motion. The fluid, sloping shape evokes the idea of dynamism and upward momentum, symbolizing the challenge and energy of an uphill cyclist.

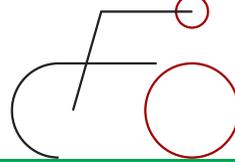

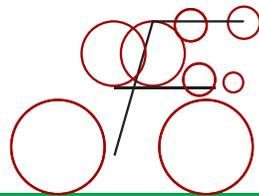

The logotype integrates harmoniously with the pictogram and is composed of a modern, simple, and legible font, reflecting a young and contemporary visual language. The typography is designed to be easily recognizable and adaptable to different formats and media.

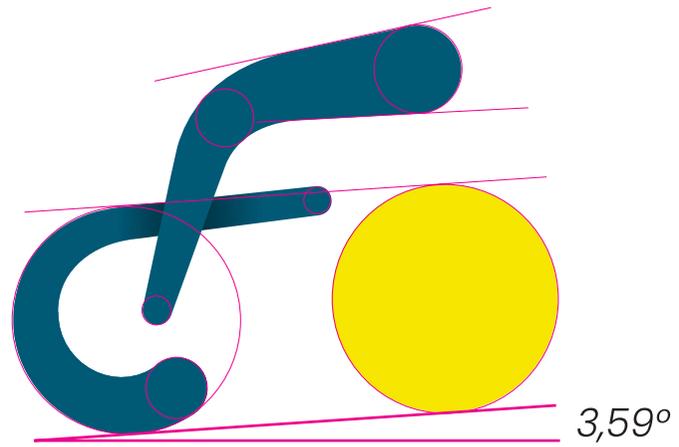

The logotype and pictogram can also be used independently, offering versatility for various applications. Whether used together or separately, they maintain a strong visual identity and communicate the essence of cycling, movement, and vitality. The flexibility of using either element alone ensures that the brand remains impactful across a wide range of formats and media.

Concept

The new Fantacycling brand draws inspiration from a cyclist climbing uphill, a symbol of determination and relentless effort. The circular elements evoke the concept of team and community, expressing the idea of a shared journey toward common goals. The design captures the dynamism and energy of cycling, conveying a sense of motion, passion, and growth. This new visual identity celebrates not only the essence of cycling as a sport but also Fantacycling's commitment to creating an inclusive and international community. It brings together not only cyclists but also cycling enthusiasts of all kinds, offering a unique platform where strategy, competition, and passion converge. Just like cycling.

Minimum Dimensions and Clearance Area

The logo maintains excellent readability even at reduced sizes. Minimum dimensions for web and print are represented here. The minimum space to observe when positioning the logo near other elements is determined by a module corresponding to the logotype height.

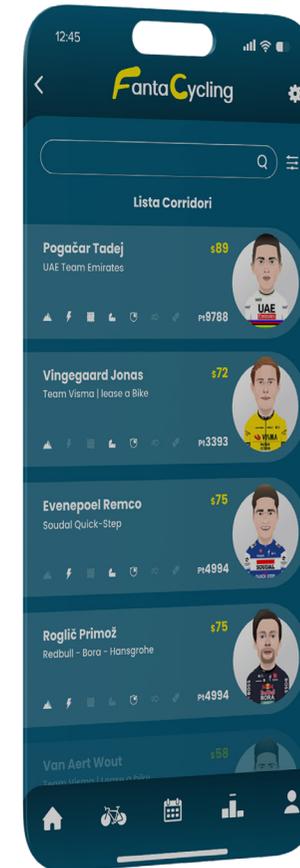

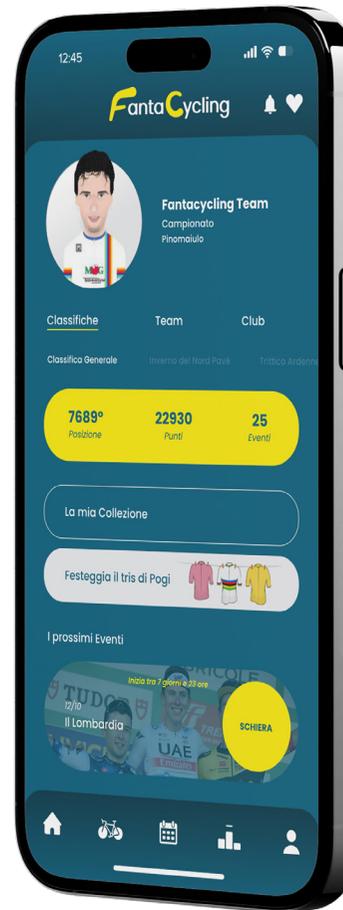

Pattern

Inspired by the distinctive shapes and elements of the bike, the pattern reflects the fluid movements of the chain and wheels. The dynamic and harmonious lines evoke the continuous rhythm and fluidity of cycling movement, creating a design that expresses balance, energy, and lightness.

App (Layout and Icon)

A modern interface with a teal-blue palette, optimized for an intuitive experience. The minimalist icon recalls the logo and the design's fluid lines.
